

INDUSTRIAL SOLUTIONS

One-Source solutions for all your INDUSTRIAL TIRE and WHEEL needs!

INDUSTRIAL SOLUTIONS is a division of Snider Tire, Inc., recognized as an industry leader in providing innovative outsourcing solutions to large, multi-location fleets around the corner, across the state, and throughout the country, coast to coast. Founded in 1976, Snider has become one of the largest all-source tire dealers in the nation.

Professional Technicians

Our technicians are all TIA certified professionals trained in industrial commercial as well as OTR tire installation. We offer safe, courteous service 365 days a year, 7 days a week, 24 hours a day for your benefit.

Custom Solutions

We can customize an industrial tire, wheel or assembly to meet your specific requirements for all types of applications including waste, quarry, distribution, and recycling, among others.

Our Product Guarantee

We will provide you with the “lowest cost per operating hour” product or refund the performance shortfall.

Lowest Cost Guarantee

We positively will not be undersold on like product.

We afford our customers the BEST service, BEST products, and BEST prices! Your satisfaction is guaranteed!

Superb Products

Our product line is unsurpassed! We offer Michelin, Continental, Maine, ITL, Shun Gin, and MITCO products including press-on band tires, resilient solid tires, industrial radial and bias ply tires, OTR tires, as well as solid tire wheel assemblies from GPX Brawler and Shun Gin. We also offer both standard industrial wheels and custom wheels to meet all your material-handling needs.

When you need us... "Wheel" be around!

What makes us different?

On-Demand Service — Orders received today can be performed on same day or next day basis!

Scheduled Service — We can accommodate installation to your specific schedule—we're here when you need us!

Mounted Tire Programs — We can customize a mounted tire program for your fleet that will eliminate costly service calls and installation charges while making product available for your company when and where you need it!

Fleet Evaluations — We provide on-site fleet analysis for your industrial fleet at no extra charge. These evaluations allow you to manage your needs and know that you are getting what you pay for when it comes to service and product.

Utilization Reports — Our reports note your tire purchases by location and unit, and calculate cost per hour based on the longevity of each product we provide. We provide cradle to grave accountability for our services, products, and comprehensive programs.

Scrap Analysis — Available for all our customers to ensure tires that are removed meet your specific replacement standards.
